

1.2 PROTECTION OF ENVIRONMENT POLICY STATEMENT

DMD Installations Ltd recognise the importance of ensuring the wellbeing of the environment whilst executing their operations. The Company recognises that effective management of our environment makes good sense from both a business and societal viewpoint, and therefore must be a fundamental and integral part of our business strategy.

The Company will achieve these aims by undertaking the following:

- complying with all relevant legislation;
- developing and implementing procedures to prevent pollution to the environment;
- taking environmental factors into consideration in any new developments or contracts works;
- reducing waste and consumption of natural resources wherever possible;
- responding to the needs and concerns of the nearby community promptly and responsibly;
- co-operating in any investigations concerning hazardous emissions or incorrect disposal of hazardous waste from our activities;
- requiring our suppliers and sub-contractors to have a proper regard for our Installations Policy when supplying us with goods and/or services;
- disposing of waste materials as required by the requirements of current legislation;
- communicating this policy to our staff, suppliers and customers, and seeking their assistance in implementing it;
- reviewing this policy annually or upon changes in applicable legislation or company procedure or organisation.
